2024 Rule(s) Bulletin

www.dirtcar.com

Bulletin: 2024 – March 27, 2024

Rule Update DIRTcar 358 Modifieds.

The following wording below in red was in last year's new intake rule bulletin but was omitted from the 2024 DIRTcar 358 Rule Book.

On-line Rule Book will be updated.

18.1.1 – Carburetor

6.) The maximum height of the carburetor when measured from the bottom of the carburetor and/or the throttle plate to the machined horizontal surface of block will be 7"-inches in both the front and rear of the block. **The Brodix BM1000 only, must measure a maximum of 6 ½ inches when measured from the bottom of the carburetor and/or the throttle plate to the machined horizontal surface of the block of the block in both the front and rear of the block.** Any carburetor spacer may be used to maintain the height with nothing going below the top of the machine surfaced of the intake manifold. Turtles, air dams and/or any type of similar device will not be permitted.
